

## CLAIMS

What is claimed is:

1. An interior rear-view mirror for motor vehicles comprising:  
a mirror housing in which at least one speaker is arranged, said speaker being part of a bass reflex system that is accommodated in the mirror housing.
2. The interior rear-view mirror of claim 1, wherein the bass reflex system has at least one chamber that is sealed airtight with respect to the installation space of the mirror housing.
3. The interior rear-view mirror of claim 2, wherein the chamber holds at least one bass reflex port.
4. The interior rear-view mirror of claim 3, wherein the bass reflex port connects to an opening in a rear wall of the mirror housing.
5. The interior rear-view mirror of claim 3, wherein said bass reflex port terminates a distance away from a rear wall of the chamber.
6. The interior rear-view mirror of claim 5, wherein the rear wall of the chamber joins a top wall and side walls of the chamber to a bottom and the rear wall of the mirror housing.

7. The interior rear-view mirror of claim 6, wherein the rear wall, the top wall and the side walls of the chamber are designed as a single piece with one another.

8. The interior rear-view mirror of claim 5, characterized in that the front wall of the chamber opposite the rear wall is formed by a part of the rear wall of the mirror housing.

9. The interior rear-view mirror of claim 1, wherein the chamber with bass reflex port and speakers is designed as a plug-in module.

10. The interior rear-view mirror of claim 1, wherein the speaker faces toward a windshield of the motor vehicle.

11. The interior rear-view mirror of claim 1, characterized in that the mirror housing has an outlet, preferably an outlet grill, for the sound waves to pass through.

12. The interior rear-view mirror, particularly of claim 1, wherein the speaker can be oriented.

13. The interior rear-view mirror of claim 12, wherein the speaker can be oriented by a memory drive.

14. The interior rear-view mirror of claim 13, wherein the memory drive is located in the mirror housing.

15. The interior rear-view mirror of claim 1, wherein the bass reflex system has two speakers located next to one another and a distance apart.

16. The interior rear-view mirror of claim 15, wherein the bass reflex port is located in the region between the two speakers.

17. The interior rear-view mirror of claim 1, wherein the speaker is attached to the rear wall of the chamber.

18. The interior rear-view mirror of claim 1, wherein the bass reflex system is located in the region between the bottom and the rear wall of the mirror housing.

19. The interior rear-view mirror of claim 1, characterized in that the bass reflex system is arranged symmetrically with respect to a transverse center plane of the mirror housing.
